

Shreyes Jishnu Suchindran

Unity Developer | Multiplayer + Performance | Mobile + 3D

Noida, India | +91 91599 67589 | shreyesjishnu@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Unity developer with 2+ years shipping live multiplayer mobile titles in C# at scale, currently at Blacklight Studio Works on two live titles (AAGU, Ludo Superstar, Parchisi Superstar), owning multiplayer sync, live services, and cross-team feature delivery. Previously took a clinical VR build from 25 FPS to a stable 60 FPS on Meta Quest 3 through GPU and CPU profiling, with Photon (PUN) production experience from Karma Play. Eager to take on new and varied projects from gameplay and performance work to graphics and VR/AR and always looking for the next interesting problem to build.

SKILLS

Multiplayer and Networking: Photon Unity Networking (PUN), real-time state sync, reconnect handling, client-server patterns, session lifecycle debugging across mixed-device player pools

Performance Optimization: Unity Profiler, Frame Debugger, GPU and CPU profiling, draw-call reduction, frame-budget rework, memory and GC optimization for mobile

Engines and Languages: Unity 6, C# with OOP and SOLID principles, C++, Python, GLSL

Mobile and Cross-Platform: Android and iOS production builds, mobile build pipeline, live-ops release cadence, asset store pipelines

Gameplay Systems: End-to-end gameplay loops, AI behaviors, combat logic, UI / UX, scoring, input and interaction systems, animation work, VR features (Meta Quest 3 / 3S)

Graphics and Rendering: GLSL compute shaders, GPU Whitted ray tracing, BVH construction and traversal, real-time rendering, Shader Graph, URP

Tools and Workflow: Git, DOTween, AI workflows(Claude Code, Cursor, MCPs), Visual Studio, agile sprints, code reviews, technical design documentation

Multiplayer and Networking: Photon Unity Networking (PUN), real-time state sync, reconnect handling, client-server patterns, session lifecycle debugging across mixed-device player pools

EXPERIENCE

Associate Unity Developer | Blacklight Studio Works, Noida | Jan 2026 – Present

Live multiplayer mobile titles on Google Play.

- Shipped features across two live multiplayer mobile titles, Ludo Superstar and Parchisi Superstar: animation work and side games embedded within the main app.
- Ship live online services across release branches: leaderboards, in-game chat, online multiplayer sync, and asset store pipelines.
- Currently working on a Kids application consisting of multiple interactive learning modules.

Junior Unity Developer | Wundrsight Health, Bengaluru | Feb 2025 – Jan 2026

NeuralXR, ReliefXR, ReviveXR | clinical VR rehabilitation titles on Meta Quest 3 / 3S.

- Raised average frame rate from 25 FPS to a stable 60 FPS on Meta Quest 3 / 3S through GPU and CPU profiling, draw-call reduction, and frame-budget rework.
- Designed and shipped the real-time clinician livestream system: gameplay runs at 60 FPS in-headset while the encoded stream holds a stable 30 FPS for remote session monitoring.
- Built five therapy-focused VR modules end-to-end (kayaking, boxing, neck rotation, balance, guided movement) including gameplay loops, scoring logic, physics-driven interaction, and UI flows.

Unity Developer Intern | Karma Play, Remote | Nov 2024 – Jan 2025

- Built core multiplayer gameplay with Photon Unity Networking (PUN): real-time state sync, player interaction, reconnect handling for a mobile title.
- Implemented enemy AI behaviors, combat logic, UI animation, and particle effects.

FREELANCE PROJECTS

GPU Whitted Ray Tracer | GLSL Compute Shaders, OpenTK

- Built a real-time GPU ray tracer rendering 6M+ triangles in a wavefront-style pipeline. Optimized BVH traversal to reduce thread divergence; implemented early-exit hit and any-hit shader paths.

Reality Rip | *Unreal Engine 4 cinematic short*

- Award-winning real-time cinematic short integrating motion-capture animation, dynamic camera rigs, and VFX-driven lighting.

EDUCATION

M.Sc. Game and Media Technology | Utrecht University | 2024

B.E. Computer Science and Engineering | Sri Ramakrishna Engineering College | 2020

LANGUAGES

English, Hindi, Kannada, Tamil, Telugu
